**New York, NY** - After reeling from a series of global wars, an anxious peace resides over the planet Tyr. As people start to rebuild, civilization is again threatened by a new enemy, The Horde -- an army of hive-minded, cybernetic soldiers and their enigmatic leader, Lopt.

They seek the one who holds the key to a mystery; a legend that few still believe. The Horde is after Ardan, a teenage Elf, hastily trained as a Samurai, but ignorant of why he's being hunted. He teams up with Keegan, a fellow Samurai with quick wits and a quicker temper. Ardan and his ragtag crew of Samurai, crooks and bounty hunters must find out the secret before Ardan's ever increasing powers destroy the Horde...and everything else worth saving.
